Experienced Director, New Business Development Expert and Management Consultant with an Industrial Engineering foundation and a career spanning automotive aftersales, supply chain optimisation, dealer process improvement, sales leadership, business turnaround and operational execution. Proven ability to analyse complex organisations, simplify processes, build practical operating models, work effectively with teams and implement measurable improvements. Brings deep automotive industry relationships and market insight that can support consulting growth, client access and business development.

POSITIONING

Best positioning: Industrial Engineer and hands-on business optimiser who bridges strategy, process design and implementation. Strongest fit for consulting, operational improvement, automotive aftersales, supply chain, dealer network performance, transformation programmes and growth mandates.

CORE COMPETENCIES

Operational & Process Consulting	Automotive & Supply Chain	Leadership & Growth
- Business process optimisation - Operating model improvement - Lean process design - KPI design and performance dashboards - Change management and implementation	- Aftersales parts and service - Dealer process optimisation - Warehouse operations - Inventory management and replenishment - OEM and independent aftermarket strategy	- Managing Director leadership - Business development and partnerships - Sales management and network development - Technical and process training - Investor readiness and strategic partnerships

SELECTED HIGH-IMPACT ACHIEVEMENTS

- BMW SA / Namlog: led supply chain optimisation initiatives across PDC inventory, warehouse layout, receiving, binning, picking, dealer delivery runs and dealer parts processes.
- Improved warehouse receiving productivity from approximately 10 lines per man-hour to as high as 160 in receiving optimisation projects.
- Delivered bin-rightsizing and warehouse process improvements that increased storage utility by more than 30%.
- Implemented dealer inventory and automatic replenishment approaches targeting over 95% stocked-item availability while reducing obsolescence.
- Established and operated dealer optimisation programmes for two South African OEMs, focused on lead-time reduction, throughput, zero carryovers, CSI, profitability and brand loyalty.
- At Revov Batteries, developed the sales channel for a lithium ion battery company, growing sales from approximately R4 million to more than R200 million per annum over three years.
- At Turbovent Africa, progressed from business development into Managing Director responsibility, including restructuring, supplier negotiations, brand development, national sales, dealer network development and strategic investor discussions.

PROFESSIONAL EXPERIENCE

Managing Director / Business Growth Lead | *Turbovent Africa* | 2024 - Present

- Returned to the business after concluding the Stellantis engagement in September 2024, with a mandate to grow the company, strengthen operations and pursue investor partnerships.
- Responsible for commercial strategy, team alignment, sales growth, operational discipline, supplier relationships and management reporting.
- Focused on positioning Turbovent for scalable growth through product lines, professional/specifier sales, installer networks and strategic partnerships.

Founder / Principal Consultant | *Ample Ideas* | 2010 - Present

- Provides management consulting and business process optimisation services, with emphasis on supply chain, logistics, inventory, sales management, project delivery and dealer process improvement.
- Works with clients to map processes, identify inefficiencies, design practical improvements and support implementation through training, reporting and team engagement.
- Automotive consulting focus includes OEM aftersales, independent aftermarket development, dealer process intervention, parts inventory and service process performance.

Business Development Manager / Consultant | *Stellantis South Africa* | 2022 - September 2024

- Developed independent aftermarket strategy in South Africa and MEA, including market research, parts range requirements, network development and growth planning.
- Supported Eurorepar, Distrigo and Eurorepar Car Service Centre development through strategy, commercial planning and dealer/market analysis.
- Delivered technical and process training to Stellantis network and staff, combining product knowledge with practical process improvement and change management.

Sales Manager / Channel Development Lead | *Revov Batteries* | 2019 - 2022

- Built and managed a national sales channel for a lithium iron battery company, including distributor relationships, key accounts, sales team recruitment, branch development and training.
- Contributed to rapid revenue growth from approximately R4 million to more than R200 million per annum over a three-year period.
- Delivered technical and sales training, developed large-capacity battery opportunities and supported export customers in Namibia, Botswana and Zimbabwe.

Managing Director / Business Development Manager | *Turbovent Africa* | *Earlier tenure - 10 years*

- Promoted from Business Development Manager to Managing Director within a national HVAC and air conditioning products business.
- Led business restructuring, global supplier negotiations across China, USA, Europe and Australia, brand development, national sales and dealer network development.
- Contributed to business growth and eventual sale to Beijer Ref, including management reporting, cost reduction and strategic supplier contracting.

Business Development / Private Equity Projects | *Louw & Co* | 2 years

- Identified and on-boarded target business opportunities, supported investor relations, due diligence, financial contract negotiation and project management.
- Worked directly with business owners to structure and execute financing arrangements with private equity investors.

Aftersales Consultant | *FCA South Africa* | 7 years

- Consulted across aftersales, dealer processes, parts and service operations, including process mapping and operational improvement initiatives.
- Mapped FCA processes using IBM Blueworks Live, creating collaborative process documentation and a central process repository.

Supply Chain Optimisation Project Manager / In-house Consultant | *BMW SA / Namlog* | 8 years

- Led supply chain optimisation initiatives across PDC inventory, warehouse processes, warehouse layout, local distribution centres, dealer delivery runs and dealer parts/service processes.
- Delivered measurable operational improvements in receiving productivity, same-day binning, storage utility, picking speed, scanning systems, pre-packing and cross-dock procedures.
- Recognised through Logistics Achiever Awards and BMW Platinum Award.
